I INTRODUCTION (U)

(S/CL-3/NOFORN) In response to correspondence from Army INSCOM dated 27 April 1983 and 2 August 1983, and to discussions with INSCOM personnel on 7 and 8 September 1983, SRI International submits this proposal to initiate the selection of personnel for Remote Viewing (RV) tasking.

(S/CL-1/NOFORN) To accomplish the proposed program, SRI will provide the facilities, materials, SRI staffing, and consultants to perform the tasking outlined in the INSCOM Statement of Work dated 2 August 1983. Details of the effort are specified in the following section.

**SECRET**

**SECRET**

SECRET/CENTER LANE-3/NOFORN

## II STATEMENT OF WORK (U)

### 1. (U) GENERAL

1.1 (S/CL-3/NOFORN) The objective of this effort is to investigate a particular aspect of psychoenergetics relating to operational management of personnel; that is, determine if a personality testing technique can be created, which when applied to a general population will delineate specific individuals who exhibit a higher degree of talent for remote viewing.

### 1.2 (U) MAJOR GOALS

a. (S/CL-3/NOFORN) Phase I: Apply personality testing with proven remote viewer personnel from SRI and Project CENTER LANE, and determine testing profile(s) that can be used to identify personnel with an aptitude for remote viewing.

b. (S/CL-3/NOFORN) Phase II: Test these same individuals with "self-report" type tests, and compare the results of these tests with the previously identified profile(s) to determine testing accuracy. Apply the identified profile(s) against a general test population and segregate persons who show a talent for remote viewing from those who do not.

c. (S/CL-3/NOFORN) Phase III: Test the personnel who show a talent for remote viewing against randomly selected targets; test the personnel who did not show a talent against the same targets.

d. (S/CL-3/NOFORN) Provide an overall evaluation of the above three phases with conclusive recommendations. If the first two phases produce negative results, an overall evaluation of those two phases will be made, including a recommendation for further action.

### 2. (U) SPECIFIC TASKS

#### 2.1 (U) Phase I

a. (S/CL-3/NOFORN) Personality profile data from proven remote viewers will be collected. Data will be collected from proven personnel-- those identified by SRI as well as Project CENTER LANE participants.

b. (U) The data will be collected by using an extended Wechsler Test.

c. (U) It is planned that testing will be carried out under laboratory conditions by two experienced testers: Dr. David Saunders,

**SECRET**

~~SECRET~~

SECRET/CENTER LANE-3/NOFORN

(U)

MARS Measurements Association (SRI Consultant), Lawrenceville, New Jersey; and Dr. Michael Hecker (an SRI Staff Member).

d. (U) The data obtained will be analyzed in accordance with the Personality Assessment System (PAS) concept.

e. (U) The above analysis will provide the basis upon which specific and appropriate personality profile(s) of interest will be designated; those profiles will be extrapolated for use during Phase III.

f. (U) An interim report of findings from Phase I will be provided.

## 2.2 (U) Phase II (Will be run in parallel with Phase I.)

a. (S/CL-2/NOFORN) Self-report data will be collected from the selected individuals within SRI and the CENTER LANE Project. These will be the same individuals selected for testing under Phase I.

b. (U) The self-report data will be determined from tests such as the Myers-Briggs and the 16-PF questionnaires. Testing will be under laboratory conditions, and will be used to design a prescreening questionnaire.

c. (U) Analysis of the self-report data will be performed using the Behavior Prediction System (BPS) concept to generate a scoring key capable of extracting those individuals with profile(s) indicated within Phase I, as being profile(s) of interest.

d. (S/CL-3/NOFORN) The self-report test criteria will be applied against a general population. The general population will contain the previously selected SRI and CENTER LANE remote viewer personnel.

e. (U) To test whether the prescreening (self-report) test is effective in selecting individuals with the Phase I profiles, a second group of individuals will be given both the prescreening and extended Wechsler tests under like laboratory conditions, and the correlations between these results and the previous results will be evaluated.

f. (U) An interim report of findings from Phase II will be provided.

## 2.3 Phase III (Assuming success in Phases I and II, the following will be accomplished.)

a. (S/CL-3/NOFORN) The appropriate profile(s) developed through testing during Phases I and II will be used to delineate individuals into two groups: those with remote viewing potential as well as those who do not show potential.

*will screening document be prepared*

~~SECRET~~~~SECRET/CENTER LANE-3/NOFORN~~

**SECRET**

SECRET/CENTER LANE-3/NOFORN

b. (S/CL-3/NOFORN) Personnel who show potential in remote viewing will then be tested (under laboratory conditions) against a randomly selected group of targets.

c. (S/CL-3/NOFORN) Personnel not selected as having potential will also be run (under laboratory conditions) against the same selected group of targets.

d. (S/CL-3/NOFORN) A comparison of both groups of personnel will then be made to determine the validity of selection criteria developed and presented from Phases I and II.

e. (S/CL-3/NOFORN) Should it be proven by failure in Phases I and II that a personality profile cannot be developed that will assist in selecting appropriate remote viewer personnel, then Phase III will be canceled with the concurrence of the sponsor, and all monies left transferred to ongoing remote viewer training.

### 3. (U) SECURITY

(U) Military security requirements in the performance of this contract shall be maintained in accordance with the "CENTER LANE SECURITY PROCEDURES GUIDE," dated 1 March 1983 (S/CL-1/NOFORN/ORCON). The highest classification involved in the performance of this contract is SECRET/CL-4/NO FOREIGN DISSEMINATION/ORIGINATOR CONTROLLED.

### 4. (U) DELIVERABLES

(U) SRI International will provide the following:

4.1 (S/CL-1/NOFORN) State-of-the-art information on selection of personnel with a talent for remote viewing.

4.2 (S/CL-3/NOFORN) A progress report (2 copies)--a written evaluation of findings (within 10 days of completion) of Phase I, development of and use of psychological profile(s) testing.

4.3 (S/CL-3/NOFORN) A progress report (2 copies--a written evaluation of findings (within 10 days of completion) of Phase II, development of and use of self-report testing; to include comparison for accuracy against Phase I testing, and use of the newly designed prescreening questionnaire.

4.4 (S/CL-3/NOFORN) A final report (3 copies) (within 30 days following completion) of the overall evaluation of the developed selection testing methodology. This report will include but is not limited to the following:

a. (S/CL-3/NOFORN) A summary of tests performed in each methodology area, an evaluation of those tests, and a written comparison of one test methodology to another.

**SECRET**

~~SECRET~~  
SECRET/CENTER LANE-3/NOFORN

b. (S/CL-3/NOFORN) Findings that result from the application of testing methodologies (against a general population) to select remote viewers. This will include an evaluation of remote viewing results as produced by those personnel identified as talented, as well as results from those who were not identified as talented.

c. (S/CL-3/NOFORN) A summary of recommended testing for future selection of remote viewer personnel based upon the above.

5. (U) SPECIAL REQUIREMENTS

(U) Requirements concerning the use of human subjects as outlined in the INSCOM Statement of Work dated 2 August 1983 will be adhered to.

UNCLASSIFIED

ROBERT S. LEONARD

Director  
Radio Physics Laboratory  
Research & Analysis Division

**SPECIALIZED PROFESSIONAL COMPETENCE**

Radio-wave propagation: in normal environments; in naturally disturbed environments (aurora); in manmade disturbances (nuclear explosions)

**REPRESENTATIVE RESEARCH ASSIGNMENTS AT SRI (since 1961)**

Project director of a program to remotely sense nuclear detonations during the U.S. high altitude nuclear test program  
Led a research effort to improve the U.S. capability to detect foreign nuclear test by their effect on radio propagation  
Technical director of a large multicontractor research program to study the effects on radio propagation of an artificially produced ionospheric plasma  
Technical director on a program to develop special communications techniques

**OTHER PROFESSIONAL EXPERIENCE**

Instructor, researcher, and graduate student, Geophysical Institute, University of Alaska: HF and low VHF radio-wave propagation studies of auroral effects; designed, developed, and tested a prototype of the 41-MHz auroral radar used in the U.S. IGY program; installed and operated the six Alaskan IGY-auroral radars, and analyzed the data collected during the IGY

Teaching assistant, Physics Department, University of Nevada

**ACADEMIC BACKGROUND**

B.S. (1952) and M.S. (1953) in physics, University of Nevada; Ph.D. in geophysics (1961), University of Alaska

**PUBLICATIONS**

"Observations of Ionospheric Disturbances Following the Alaska Earthquake," J. Geophys. Res. (March 1965); "Selection of a Model of the Earth's Magnetic Field," J. Geophys. Res. (December 1962); "Evidence of Low-Frequency Amplitude Fluctuations in Radar Auroral Echoes," J. Geophys. Res. (April 1962); "Distribution of Radar Auroras over Alaska," J. Geophys. Res. (March 1962); "A Low Power UHF Radar for Auroral Research," PIRE (February 1959); plus numerous scientific and technical reports

**PROFESSIONAL ASSOCIATIONS**

American Geophysical Union  
Union Radio Scientifique Internationale

UNCLASSIFIED

**UNCLASSIFIED**

HAROLD E. PUTHOFF

Senior Research Engineer  
Radio Physics Laboratory  
Research and Analysis Division

**SPECIALIZED PROFESSIONAL COMPETENCE**

Research in "remote viewing" and other psi phenomena (1972-present)  
Research in lasers, quantum electronics, nonlinear optics  
Research and development of tunable solid-state lasers, electron beam lasers, microwave tubes

**OTHER PROFESSIONAL EXPERIENCE**

Research associate, Hansen Laboratories of Physics, and lecturer, Department of Electrical Engineering, Stanford University; teaching, textbook author, research supervisor of Ph.D. candidates in the area of lasers and nonlinear optics  
Lieutenant, USNR: in-house research and contract monitoring on DoD (NSA) contracts concerned with the development of ultra high-speed (GHz) computers, assessment of potential of fiber optics and lasers for use in optical computers  
Research engineer, Sperry Electronic Tube Division, and Sperry fellow, University of Florida: design and testing of electron-beam focusing systems for use in microwave tubes

**ACADEMIC BACKGROUND**

B.E.E. (1958) and M.S.E. (1960), University of Florida; Ph.D. in electrical engineering, Stanford University (1967)

**PUBLICATIONS AND PATENTS**

Author or coauthor of more than twenty-five papers in professional journals on electron beam and laser research, and, more recently, first major publications of research on psi phenomena in Nature ("Information Transfer Under Conditions of Sensory Shielding," Oct. 1974), in the Proceedings of the IEEE ("A Perceptual Channel for Information Transfer over Kilometer Distances," March 1976) and in The Role of Consciousness in the Physical World: AAAS Selected Symposium 57, Ed. R. Jahn, ("Experimental Psi Research: Implications for Physics", Westview Press, 1981  
Coauthor of textbook, Fundamentals of Quantum Electronics (Wiley, New York, 1969) published in English, French, Russian;  
Coauthor of Mind Reach: Scientists Look at Psychic Ability (Delacorte, New York, 1977);  
Coeditor of Mind at Large: IEEE Symposia on the Nature of Extrasensory Perception (Praeger, New York, 1979);  
Patent on high-power tunable infrared laser source (50-250 microns)

**PROFESSIONAL ASSOCIATIONS AND HONORS**

American Association for the Advancement of Science, American Physical Society, Institute of Electrical and Electronics Engineers, Sigma Xi, Department of Defense Certificate of Commendation for Outstanding Performance, IEEE Franklyn V. Taylor Memorial Award for paper "A Scientific Look at ESP," listed in American Men and Women of Science and in Who's Who in the West

**UNCLASSIFIED**

EDWIN C. MAY

Senior Research Physicist  
Radio Physics Laboratory  
Research and Analysis Division

SPECIALIZED PROFESSIONAL COMPETENCE

Charged particle and gamma-ray spectroscopy; analogue and high-speed digital electronics; numerical analysis; real-time computer applications for data acquisition and analysis; research in bio-feedback technology and applications, and cardiac blood flow problems; field research in India and laboratory research at Maimonides Medical Center on psycho-energetic phenomena, aerodynamic analysis from fixed wing, powerless soaring aircraft

OTHER PROFESSIONAL EXPERIENCE

Theoretical calculations in radiation transport;, atmospheric physics, and E & M wave scattering at the RAND Corporation  
Experiments in nuclear reaction mechanism and nuclear structure at the U. of California Crocker Nuclear Laboratory  
Undergraduate physics teaching at the City College of San Francisco  
Equipment engineer and clinical experience at the Bio-feedback Institute of San Francisco  
Research consultant on psychokinesis at the Maimonides Medical Center

ACADEMIC BACKGROUND

B.S. in physics, University of Rochester (1962); Ph.D. in physics, University of Pittsburgh (1968)

PUBLICATIONS

Author or coauthor of eleven scientific papers in experimental nuclear physics research;  
Author or coauthor of numerous scientific papers in psychoenergetic research;  
Author or coauthor of eleven research abstracts in nuclear physics for professional meetings  
Author or coauthor of ten abstracts in psychoenergetic research for professional and meetings

PROFESSIONAL ASSOCIATIONS

American Physical Society, American Association for the Advancement of Science, Institute of Electrical and Electronics Engineers, Parapsychology Association, The American Society for Psychical Research
